EXPERIENCE

Intellistop, Toronto—Junior Software Engineer

April 2019 - Present

Using Flask & Vue, designed, developed and tested a suite of features allowing users to work together in real time. Designed and implemented a service to create random and non random dummy data for mocking third party integrations. Visualized components using Figma and developed them using Vue and Vuetify

Daakor Inc, Toronto—Junior Full Stack Developer

January 2019 - March 2019

Maintain and extend the functionality and usability of the SaaS platform Daakor.com by working on the items from the current sprint backlog or remedying bugs and issuing fixes. Utilized technologies like AWS and Angular.

Social Enterprise for Canada, Newmarket— Full Stack Developer Intern

July 2018 - December 2018

Create fully featured applications, working with both front and back end technologies like Vue.js, MySQL and Laravel and incorporating them into functioning MVC projects for end user and corporate use. Thoroughly testing applications and validating and verifying adherence to requirements.

EDUCATION

Ryerson University, Toronto— Bachelors of Science

September 2016 - April 2020

Majoring in Computer Science & minoring in Philosophy.
